

Planting Our Carrots and Parsnips!

Our next stage on our *Glorious Gardening* mission was to plant our carrots and parsnips! With our safety in the garden heads on again, here we are ready with our gardening gloves on!

Our first step was to break up the lumps of soil, so it was finer and then we gently levelled this off and patted it down with our trowels.

We then each made a long 'drill' in the soil.

Because the seeds are so tiny, we had to be very careful, so we emptied a few on our trowels ready to put into the drills.

One by one we sprinkled the seeds into soil, making sure that they were spread out across the drill.

When all the seeds were sown, we then gently spread the soil over them until they were all covered and with our trowels, we patted the soil down.

When we were happy with our planting, we then gave them all lots of water.

Mission accomplished! Let's see how quickly they start to grow.....
