

## Planting our Peas!

*With so much to do in our Glorious Gardening area, we now have our Glorious Gardening Club with Mr Parker every lunchtime. This time our group are planting peas!*

*Here we are gloves at the ready!*

*Our first job was to break up all the lumps in the soil with our forks and trowels, this was to make the soil a lot finer.*

*Once all the soil was broken down, we then made it level and one by one we each made a deep line in the soil called a 'drill'.*

***Our next step was to take a handful of pea seeds each, they looked like peas we normally eat, but these were all wrinkly and dried up! Carefully we sprinkled these evenly in the drills until we had none left.***

*Our next task was to cover all of the seeds with soil, we then gently patted it down with our trowels.*

*At last our pea seeds were planted. All we needed to do today was to give them some water from our water butt.*

***When the peas begin to grow, we will need to give them something to grow up, so watch this space to see what we do next.....***
