

What a Saga!

Year 3
Autumn 1
Curriculum Overview

Maths

As mathematicians, we will master numbers to 1000 by working on place value and applying this to addition and subtraction within 1000.

Science

As scientists, we will learn to identify different types of rock through careful observation. We will learn about fossil formation, discovering creatures that lived millions of years ago.

Reading

We will enjoy lots of exciting Viking stories this half term, from traditional Viking sagas to tales of dragons and adventure. We will be working on retrieval, prediction and inference skills.

Art

As artists, we will explore the use of black and white paints to change the tone of a colour. We will gather our experiments in a sketchbook before using our skills to illustrate a Viking saga!

Writing

This half term, we will base our writing around Norse mythology, writing our own Viking Saga and even helping Odin to decide if Loki should be allowed to stay in Asgard!

D&T

We will design and create our own Viking boat, exploring different structures and features in order to build the fastest ship!

History

In History, we will learn about the Vikings through a variety of sources. We will explore Viking invasions, comparing different representations of the past.

Computing

We will focus on e-safety this half term, including ways to protect your personal information online and safety features of different websites.
