

Child Of Our Time

Year 3 – Summer 1
Curriculum Overview

Maths

As Mathematicians, we will continue to practice the written methods of multiplication and division in different contexts.

Reading

We are becoming very good at recognising different types of reading comprehension question. This half term we will take on some more challenging texts such as Iron Man!

Writing

As Writers, we will create our own rags-to-riches tale based on the children's classic, Cinderella. In poetry, we will explore some riddles before creating our very own using metaphors and careful observation.

History

As Historians, we will explore the history of our local area from the perspective of a child, comparing it to our own experiences. We will speak to older generations as a primary source of information, and even create our own time capsule to share with future generations!

Science

As Scientists, we will learn about different forces and the circumstances needed to create them.

PE

As Gymnasts, we will develop the skills of rolling, jumping and balancing and use them individually and in combination. As Cricketers, we will learn about how we can use skills, strategies and tactics to outwit the opposition.

Art

As Artists, we will learn about sculpture in the local area. We will explore a range of different materials used to create sculptures, before creating our own sculpture to represent our local history.

Computing

In Computing, we will create a podcast about an aspect of local history or childhood.

D&T

As Designers, we will research, design and make a children's product.
