

SUSTAINABILITY NEWSLETTER

WATER AND PLASTIC

- In November our Year 5 and 6 took part in a water cycle activity.
- Led by Mrs Cole from South Staffs Water, the children were very engaged and learnt some useful tips on how to save water.
- Ask them how long you should be in the shower for or what you should do with the water you rinse rice with?!

CLIMATE ACTION PLAN

- We are already working on parts of our Climate Action Plan; our garden and grounds work, waste recycling, school travel plan and a clean air initiative.
- Some of our ECO leaders have become energy monitors; checking that unnecessary electrical equipment is turned off as well as continuing our playground litter picks.
- We are already looking forward to our other sustainable days planned for next year; plants and animals, travel and energy.
- We are also hoping to set up a rainfall harvest system next year and tidy the pond area.

ECO COMMITTEE

This term has seen us welcome a new ECO committee, which is currently growing every year. As always, they are very enthusiastic and knowledgeable and bring lots of ideas to the meetings. As we move towards a more sustainable focus, they will be involved in leading different aspects of our Climate Action Plan.

WASTE AND RECYCLING

Our KS1 children recently took part in some recycling activities, led by Mr Myatt from Veolia. Again, our children were actively engaged, including using virtual headsets to take a tour of the recycling site.
